<u>IMPLEMENTING WEB APPLICATION</u>

<u>INTEGRATE RAPID API</u>

index.py

```
import requests

url = "https://news-api14.p.rapidapi.com/top-headlines"

querystring = {"country":"us","language":"en","pageSize":"10","category":"sports"}

headers = {
    "X-RapidAPI-Key": "SIGN-UP-FOR-KEY",
    "X-RapidAPI-Host": "news-api14.p.rapidapi.com"
}

response = requests.request("GET", url, headers=headers, params=querystring)

print(response.text)
```

RAPID API :
